Milestone 1

Test test test

```java
public class FlipFlop {

        private boolean flip = true;

        synchronized public void flip() throws InterruptedException{
                while(flip){
                        wait();
                }
                flip = false;
                System.out.println("Flip!");
                notifyAll();
        }

        synchronized public void flop() throws InterruptedException{
                while(!flip){
                        wait();
                }
                flip = true;
                System.out.print("Flop!");
                notifyAll();
        }
}
```
